

AV / Event Technology Solutions

## General Session/Breakouts & Technology

We are proud to own, operate and have access to one of the largest and most up-to-date audio/visual inventories in the country. We are a national audio/visual company providing affordable and unique audio/visual solutions for hundreds of events yearly.

## Conference & Event Apps

The benefits of a mobile app are endless! Beyond the cost savings of eliminating printing, apps provide an incredible attendee experience while giving your sponsors and exhibitors a better platform with optimum exposure. CCR provides FREE apps as your preferred AV provider!

## Custom Digital Animated Signage

A unique and crystal clear option, custom created for your event! Digital animated signage can specifically enhance first impressions, inform attendees, be used to sell sponsorship, highlight event information, provide call-to-action on events and provide a provide a format for additional marketing. Also an excellent opportunity for those clients who have decided to go paperless.

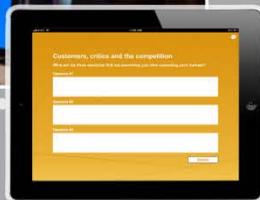

## Digital Touchscreen & Interactive Map

Let your attendees to find all the needed information in one place and at their leisure – available anytime day or night. This is an efficient and popular option to take the pressure off your team to answer needed questions and direction. It’s also a perfect fit for those events that go paperless. The look and feel is catered around your event. Graphics and marketing information is customized toward what you want to provide.

## Phone & Tablet Charging Stations

Every event needs one! At some point in the day your attendee’s phones or tablets need to be charged, but sometimes they forget their chargers. The phone charging stations can charge all types of smart phones. Take advantage of a 24” monitor to sell advertisements or marketing messages using pictures or video while your attendees wait. We can also design custom animated graphics or video to display.

## iPad Audience Response Systems

A unique and powerful engagement tool while generating conversations and involvement. The app is custom-skinned for each event so that it reflects your brand, your meeting and your message. Delegate responses, ideas, and feedback are captured, facilitated, and synthesized. Responses can then be displayed on the main screens or iPads for further discussion. All attendee input is formatted into reports for review immediately after the session.
